

IMPACT REPORT

Next Generation European Research Vessels: Current Status and Foreseeable Evolution, *EMB Position Paper 25, October 2019*

& Next Generation European Research Vessels, *EMB Policy Brief 7, March 2020*

The EMB work on European Research Vessels was conducted by a working group of 17 members in 2018 and 2019. The working group was chaired by Per Nieuwjaar (IMR, Norway), and co-chaired by Valerie Mazauric (IFREMER, France).

The Position Paper was launched at a joint open session between EMB and EurOcean Foundation in Berlin, Germany on 6 November 2019. Over 50 participants attended the session and the launch was covered on the EMB website and Twitter account.

The Policy Brief was launched at the H2020 Eurofleets+ Project meeting in Lisbon, Portugal on 3 March 2020. Both documents have also been heavily cited and disseminated by the project and its partners.

Communication highlights for the publications were the number of magazine and industry journal articles which covered the main messages and findings of these publications, bringing the document to the attention of a wider audience including the maritime industry. There were also a high number of events which highlighted the document, most notably the joint event with CETMAR in Vigo, Spain in January 2019, which was well attended by the Spanish research vessel building industry.

The document has also been widely used at national level throughout Europe to support discussion on new and ongoing investment in research vessel infrastructures. In this scope, it has been shared with both policy makers and industry.

DISSEMINATION IN NUMBERS

These statistics are for EMB Positions Paper 25 and Policy Brief 6 combined

Data collected for a period of 2 years from launch (November 2019 to September 2021)
