

Navigating the Future VI

Gilles Lericolais – *Chair of the European Marine Board*

Supporting a global collective vision for ocean science by matching regional priorities

2024 Ocean Decade Conference Satellite Event
11 April 2024

Ocean and People:

- **An equitable Ocean (C4):**
 - Recognise and understand the many values and different narratives people have relating to the Ocean
- **Change humanity's relationship with the Ocean (C10):**
 - Appreciate the need for socio-ecological transformation including all forms of knowledge to address the problems that arose in the current system

Ocean and Climate:

- **Unlock Ocean-based solutions to climate change (C5):**
 - Explore nature-based solutions and the potential benefits they offer, taking into account local variation and needs
- **Increase community resilience to Ocean hazards (C6):**
 - Develop indicators based on information that can be monitored in the Ocean of social adaptation tipping points to future-proof mitigation / adaptation approaches

Ocean and Fresh Water:

- **Sustainably feed the global population (C3):**
 - Understand (persistent and legacy) pollutant pathways and impacts into humans via consumption of fish and seafood
- **Increase community resilience to Ocean hazards (C6):**
 - Understand salt intrusion into coastal freshwater systems and its impacts

NFVI publication

Ocean and Biodiversity:

- **Protect and restore ecosystems and biodiversity (C2):**
 - Learn from success stories in conservation and restoration, by taking social aspects into account and making sure we understand the cost of losing resources to build justification for protecting them
- **Sustainably feed the global population (C3):**
 - Consider how species' movements due to climate change may lead to governance issues and conflicts, and work to address those
